

WarehouseExpert™

Adds value to your business by improving inventory accuracy, maximizing space utilization, streamlining your workflow, and performing outstanding order fulfillment to ensure customer satisfaction.

Adapts to your present and future inventory models and business processes, without the need for continuous customization and operational disruptions. Easy to implement and customize due to flexible, rule-based system architecture.

Integrates seamlessly into your business systems and into execution systems up to the point of delivery.

Fits small to large operations, from single warehouse installations with few users to multi-facility global organizations. Small and medium organizations can enjoy the benefit of a tier-one user friendly WMS.

WarehouseExpert™

In today's dynamic distribution environment, companies that want to succeed, and not merely survive, need to maximize warehouse operation efficiency and minimize warehouse running costs.

Made4net's Warehouse Management System, **WarehouseExpert™**, was designed to support increasing operational complexity, higher customer service requirements, and the inevitable need to globalize the supply chain.

WarehouseExpert™ combines state-of-the-art technology with decades of expert knowledge in warehouse management, logistics and supply chain processes to deliver the functionality that will impact your bottom line.

In addition to the full complement of basic functionality that includes Receiving, Putaway, Picking, Packing, Loading, Replenishment, Counting and Shipping, **WarehouseExpert™** delivers superior features and functionality through industry specific templates.

WarehouseExpert™ Key Features:

Product ownership management

Multiple site management

Warehouse space optimization

Stock reduction while meeting demand

Dynamic and user-defined product attributes

Flexible UOM and packaging definitions

Policy-based putaway and picking

Real-time task management

Various types of cross-dock

Value-added services

Discrete engineered labor standards

Real-time voice integration

Warehouse analytics and reporting

Browser based, zero footprints
